What is the best part of schooling from home?

JJ

What I like about home schooling is being able to take time to really understand what I am learning. I like being able to have breaks when my attention wears thin, and then get back to school after some fresh air or some exercise.

Patrick

I like to do experiments with the tools. Especially the graduated cylinder.

Rachel H.

Every lesson has something cool to do.

There are a couple things that I like:

1. I'm at home with the cooler temperatures in my house on that I am accustomed to.
2. I have my own desk. Mine. No sharing.
3. I have a computer of my own.
4. I get away with having my feet on the desk.
5. I have a more flexible schedule. With my new job and all to work in.
6. I get away with an occasional P.J. day.

The thing we like best about home schooling is turning our home into a class room. The kids learn from so many activities. It has been fun seeing how to teach them from things we already know they love. For example, they have been getting allowance and are each saving towards something. They have enjoyed counting and recounting their change and learning the values of each coin. Also, last week I (Mom) had a baby sister. It was neat being able to tell them about birth. They were very curious! A great science lesson!
